

*Sometimes, despite a person's best efforts to protect themselves from an exposure, an employee may fall ill to COVID-19. The City of Spokane is following guidelines established by the Centers for Disease Control (CDC) and Spokane Regional Health District in its response to COVID-19.*

***\*This guidance is intended for non-public safety employees. For public safety, please contact the department's COVID Point of Contact.***

### **What happens if an employee tests positive for coronavirus?**

Any employee who tests positive for coronavirus must contact their supervisor and the **HR COVID Response** team at [erahrcovidr@spokanecity.org](mailto:erahrcovidr@spokanecity.org). If at work, they should immediately isolate and go home. The **HR COVID Response Team** will then immediately take the following steps:

- Determine the last day the employee worked.
- Compile a list of people who may have been in close contact (within six feet for at least 15 minutes and/or shared a vehicle) with the employee while at work<sup>1</sup> and notify those close contacts of possible exposure.
- Close contacts exhibiting coronavirus symptoms will be immediately isolated and sent home to quarantine.
- Asymptomatic employees (both critical infrastructure and non-critical infrastructure) who have been identified as a close contact may be instructed to self-quarantine for up to 14 days. The period of self-quarantine can be reduced to 10 days in the event 14 days is too burdensome. Employees returning to work in under 14 days must remain asymptomatic, and strictly adhere to masking and physical distancing through day 14. Testing on day 10 is recommended. Employees in this category should not ride in the same vehicle as others.
- If the employee has been in the workplace within the last seven days, HR may close off the work space and facilitate sanitization services from an outside vendor to deep clean surface areas the infected employee may have been in contact with.

The **HR COVID Response Team** will advise and assist both an infected employee and close contact(s) on eligibility for accessing their reserve FMLA/OJI Sick Leave Bank to be used during recommended quarantine periods.

### **Will employees be informed of who tested positive?**

No. The ADA prohibits the employer from sharing an employee's medical information. When the **HR COVID Response Team** notifies potential close contacts, they will maintain the confidentiality of the infected employee. It is inappropriate for employees to speculate, discuss or otherwise gossip about a coworker's medical condition or status.

### **Are employees covered under Workers Compensation?**

There are three criteria for a workers compensation claim to be valid in Washington as related to COVID-19:

1. Was there an increased risk or greater likelihood of contracting the condition due to the worker's occupation (such as a first responder or health care worker)?
2. If not for their job, would the worker have been exposed to the virus or contracted the condition?
3. Can the worker identify a specific source or event during the performance of his or her employment that resulted in exposure to COVID-19 (i.e., a first responder who actually treated a patient with the virus)?

---

### **What if a member of my household has tested positive?**

---

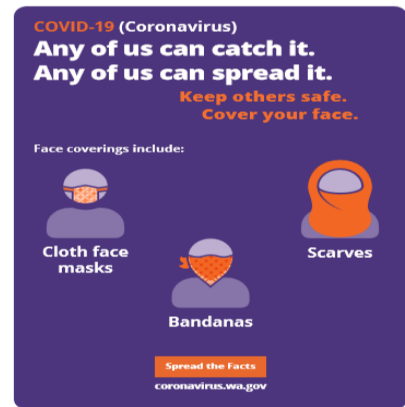

<sup>1</sup> Not all interactions result in exposure. A transient interaction (i.e. walking past someone who tested positive) does not pose an increased risk.

## IF AN EMPLOYEE TESTS POSITIVE FOR COVID-19 | Human Resources 2021

Contact the [HR COVID Response Team](mailto:erahrcovidr@spokanecity.org) at [erahrcovidr@spokanecity.org](mailto:erahrcovidr@spokanecity.org) immediately! You will likely be advised by your healthcare provider to quarantine for 10-14 days. The **HR COVID Response Team** will work with you to determine if eligible to access your FMLA/OJI Sick Leave Bank during the quarantine period.

### When can an infected employee return to work?

- If an employee tested positive for COVID-19 and had symptoms, they can return to work after all of the following conditions have been met:
  - at least 24 hours have passed since resolution of fever without the use of fever-reducing medication
  - there has been improvement in all symptoms
  - at least 10 days have passed since symptoms first appeared
- If an employee tested positive for COVID-19 but had no symptoms (asymptomatic), they can return to work after the below 2 conditions have been met:
  - At least 10 days have passed since positive laboratory test
  - They have remained asymptomatic

### What can I do to keep our workplace safe?

You can help prevent the spread of COVID-19 by:

- Using PPE when appropriate, wearing of face coverings at work, consistently cleaning and sanitizing work spaces, and the practicing social distancing whenever feasible.
- Self-monitoring for symptoms and staying home if you experience any, including: fever of over 100.4° F, cough, shortness of breath, difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, or diarrhea.

### What happens if I have received my COVID-19 Vaccination?

Employees who are fully vaccinated and have an exposure to someone with COVID-19 are not required to quarantine if they meet the following criteria:

1. Are fully vaccinated
  - a. How to determine if you are *fully vaccinated*:
    - i. 2 weeks have passed since the 2<sup>nd</sup> dose of a 2-dose series, like Pfizer or Moderna vaccines, or
    - ii. 2 weeks after a single-dose vaccine, like Johnson & Johnson's Janssen vaccine
    - iii. If it has been less than 2 weeks since your shot, or if you still need to get your second dose, you are not fully protected. You are required to take all prevention steps until you are fully vaccinated.
2. Have not had symptoms since current COVID-19 exposure

Fully vaccinated people are required to symptom monitor for 14 days after exposure. They should continue to wear masks and practice social distancing.
